Aug 2023	Software Development Engineer - I and Data Engineer Advisors: Tarunima Prabhakar, Denny George → I help build citizen centric open-source tools and datasets to understand and respond to inaccurate and harmful content. → I help build a browser extension Uli , that redact's slurs and abusive content, archive's problematic content, and collectively pushes back against online gender-based violence . Uli de-normalizes everyday violence that people of marginalized genders experience online in India. [🌐] [Media Coverage: UNFPA Report] → I lead the development of Feluda , a configurable engine for analyzing multilingual and multimodal content. Feluda helps fact-checkers and researchers in combating misinformation. [🌐] [📄] [Media Coverage: UNDP] → Feluda is being used as the back-end analysis engine on a national Deepfake detection WhatsApp helpline (Deep-fakes Analysis Unit) by the Misinformation Combat Alliance for 2024 Indian Lok Sabha elections. This helpline is funded by Meta. [Media Coverage: Nieman Lab The Hindu World Economic Forum Meta] → I build data pipelines to cluster large amount's of Audio and Video data into social media thematic labels like politics, humor, memes, devotional content etc. This work helps fact-checker's better understand, vizualize and analyze the content received on their helpline. → Worked with MLCommons to develop an AI safety benchmark dataset for hate and sex related crimes. As a part of this project, I also conducted a survey on evaluating Indic LLM's for natural language tasks and online harms. [📁 Dataset] [📄 Report] [📄]
