Software Development Engineer - I and Data Engineer | Advisors: Tarunima Prabhakar, Denny George

- → I help build citizen centric open-source tools and datasets to understand and respond to inaccurate and harmful
- → I help build a browser extension Uli, that redact's slurs and abusive content, archive's problematic content, and collectively pushes back against online gender-based violence. Uli de-normalizes everyday violence that people of marginalized genders experience online in India. [Q] [Media Coverage: UNFPA Report]
- → I lead the development of Feluda, a configurable engine for analyzing multilingual and multimodal content. Feluda helps fact-checkers and researchers in combating misinformation. [O] [%] [Media Coverage: UNDP]
- → Feluda is being used as the back-end analysis engine on a national Deepfake detection WhatsApp helpline (Deepfakes Analysis Unit) by the Misinformation Combat Alliance for 2024 Indian Lok Sabha elections. This helpline is funded by Meta. [Media Coverage: Nieman Lab | The Hindu | World Economic Forum | Meta]
- → I build data pipelines to cluster large amount's of Audio and Video data into social media thematic labels like politics, humor, memes, devotional content etc. This work helps fact-checker's better understand, vizualize and analyze the content received on their helpline.
- → Worked with MLCommons to develop an AI safety benchmark dataset for hate and sex related crimes. As a part of this project, I also conducted a survey on evaluating Indic LLM's for natural language tasks and online harms. [ Dataset] [ Report] [
