Software Development Engineer - I and Data Engineer \| Advisors: Tarunima Prabhakar, Denny George

➜ I help build citizen centric open-source tools and datasets to understand and respond to **inaccurate** and **harmful** content.

➜ I help build a browser extension Uli, that redact's slurs and abusive content, archive's problematic content, and collectively pushes back against **online gender-based violence**. Uli de-normalizes everyday violence that people of marginalized genders experience online in India. [🐙] [Media Coverage: UNFPA Report]

➜ I lead the development of Feluda, a configurable engine for analyzing multilingual and multimodal content. Feluda helps fact-checkers and researchers in combating misinformation. [🐙] [🔗] [Media Coverage: UNDP]

➜ Feluda is being used as the back-end analysis engine on a national Deepfake detection **WhatsApp helpline** (Deepfakes Analysis Unit) by the Misinformation Combat Alliance for 2024 Indian Lok Sabha elections. This helpline is funded by Meta. [Media Coverage: Nieman Lab \| The Hindu \| World Economic Forum \| Meta]

➜ I build data pipelines to cluster large amount's of Audio and Video data into social media thematic labels like politics, humor, memes, devotional content etc. This work helps fact-checker's better understand, vizualize and analyze the content received on their helpline.

➜ Worked with MLCommons to develop an AI safety benchmark dataset for hate and sex related crimes. As a part of this project, I also conducted a survey on evaluating Indic LLM's for natural language tasks and online harms. [📁 Dataset] [📄 Report] [📰]
