Topic Modelling

Finding 1

There is a clear discrepancy between what is **promoted** and what is **experienced** by the users

Meta Ads

- Easy Money
- Minimal Risk
- Debt Solution
- Income Source

Google Play Reviews

- Financial loss, scams
- Blocked/ delayed withdrawals
- Unclear rules, unresponsive support
- Addiction, Despair, Family Strain, and Severe Distress
- Rigged Game Mechanics

Finding 2

Platform compliance and Region based metadata (**transparency gap**)

We found **20,591** taken down by Meta at the time on data collection

The screenshot shows the top portion of a Reuters news article. At the top left is the Reuters logo. To the right are links for 'Subscribe', a search icon, and a menu icon. Below the header, the text 'A REUTERS SPECIAL REPORT' is displayed. The main headline reads 'Meta is earning a fortune on a deluge of fraudulent ads, documents show'. The first paragraph of the article states: 'Meta projected 10% of its 2024 revenue would come from ads for scams and banned goods, documents seen by Reuters show. And the social media giant internally estimates that its platforms show users 15 billion scam ads a day. Among its responses to suspected rogue marketers: charging them a premium for ads – and issuing reports on 'Scammiest Scammers.''. The byline 'By Jeff Horwitz' is at the bottom left, and the timestamp 'November 6, 2025 12:00 PM GMT+1 - Updated December 28, 2025' is at the bottom center.

A REUTERS SPECIAL REPORT

Meta is earning a fortune on a deluge of fraudulent ads, documents show

Meta projected 10% of its 2024 revenue would come from ads for scams and banned goods, documents seen by Reuters show. And the social media giant internally estimates that its platforms show users 15 billion scam ads a day. Among its responses to suspected rogue marketers: charging them a premium for ads – and issuing reports on 'Scammiest Scammers.'

By Jeff Horwitz

November 6, 2025 12:00 PM GMT+1 - Updated December 28, 2025

Finding 3

AI as a Force Multiplier; **14.8%** of ads were AI-generated, used to imply endorsement.

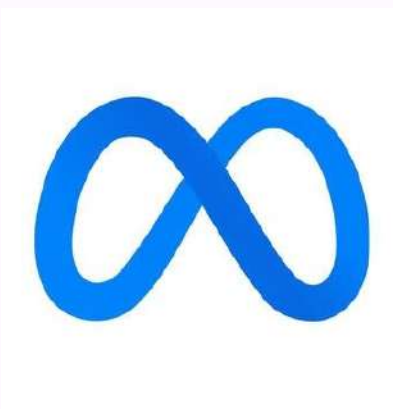

Finding 4

The Shadow Funnel and Regulatory Evasion.

Meta Ads and Instagram content **push users** to Telegram/third party websites.

Even if Google Play removes a specific betting app, the recruitment infrastructure remains intact on Meta, simply **redirecting users** to a new domain or a channel

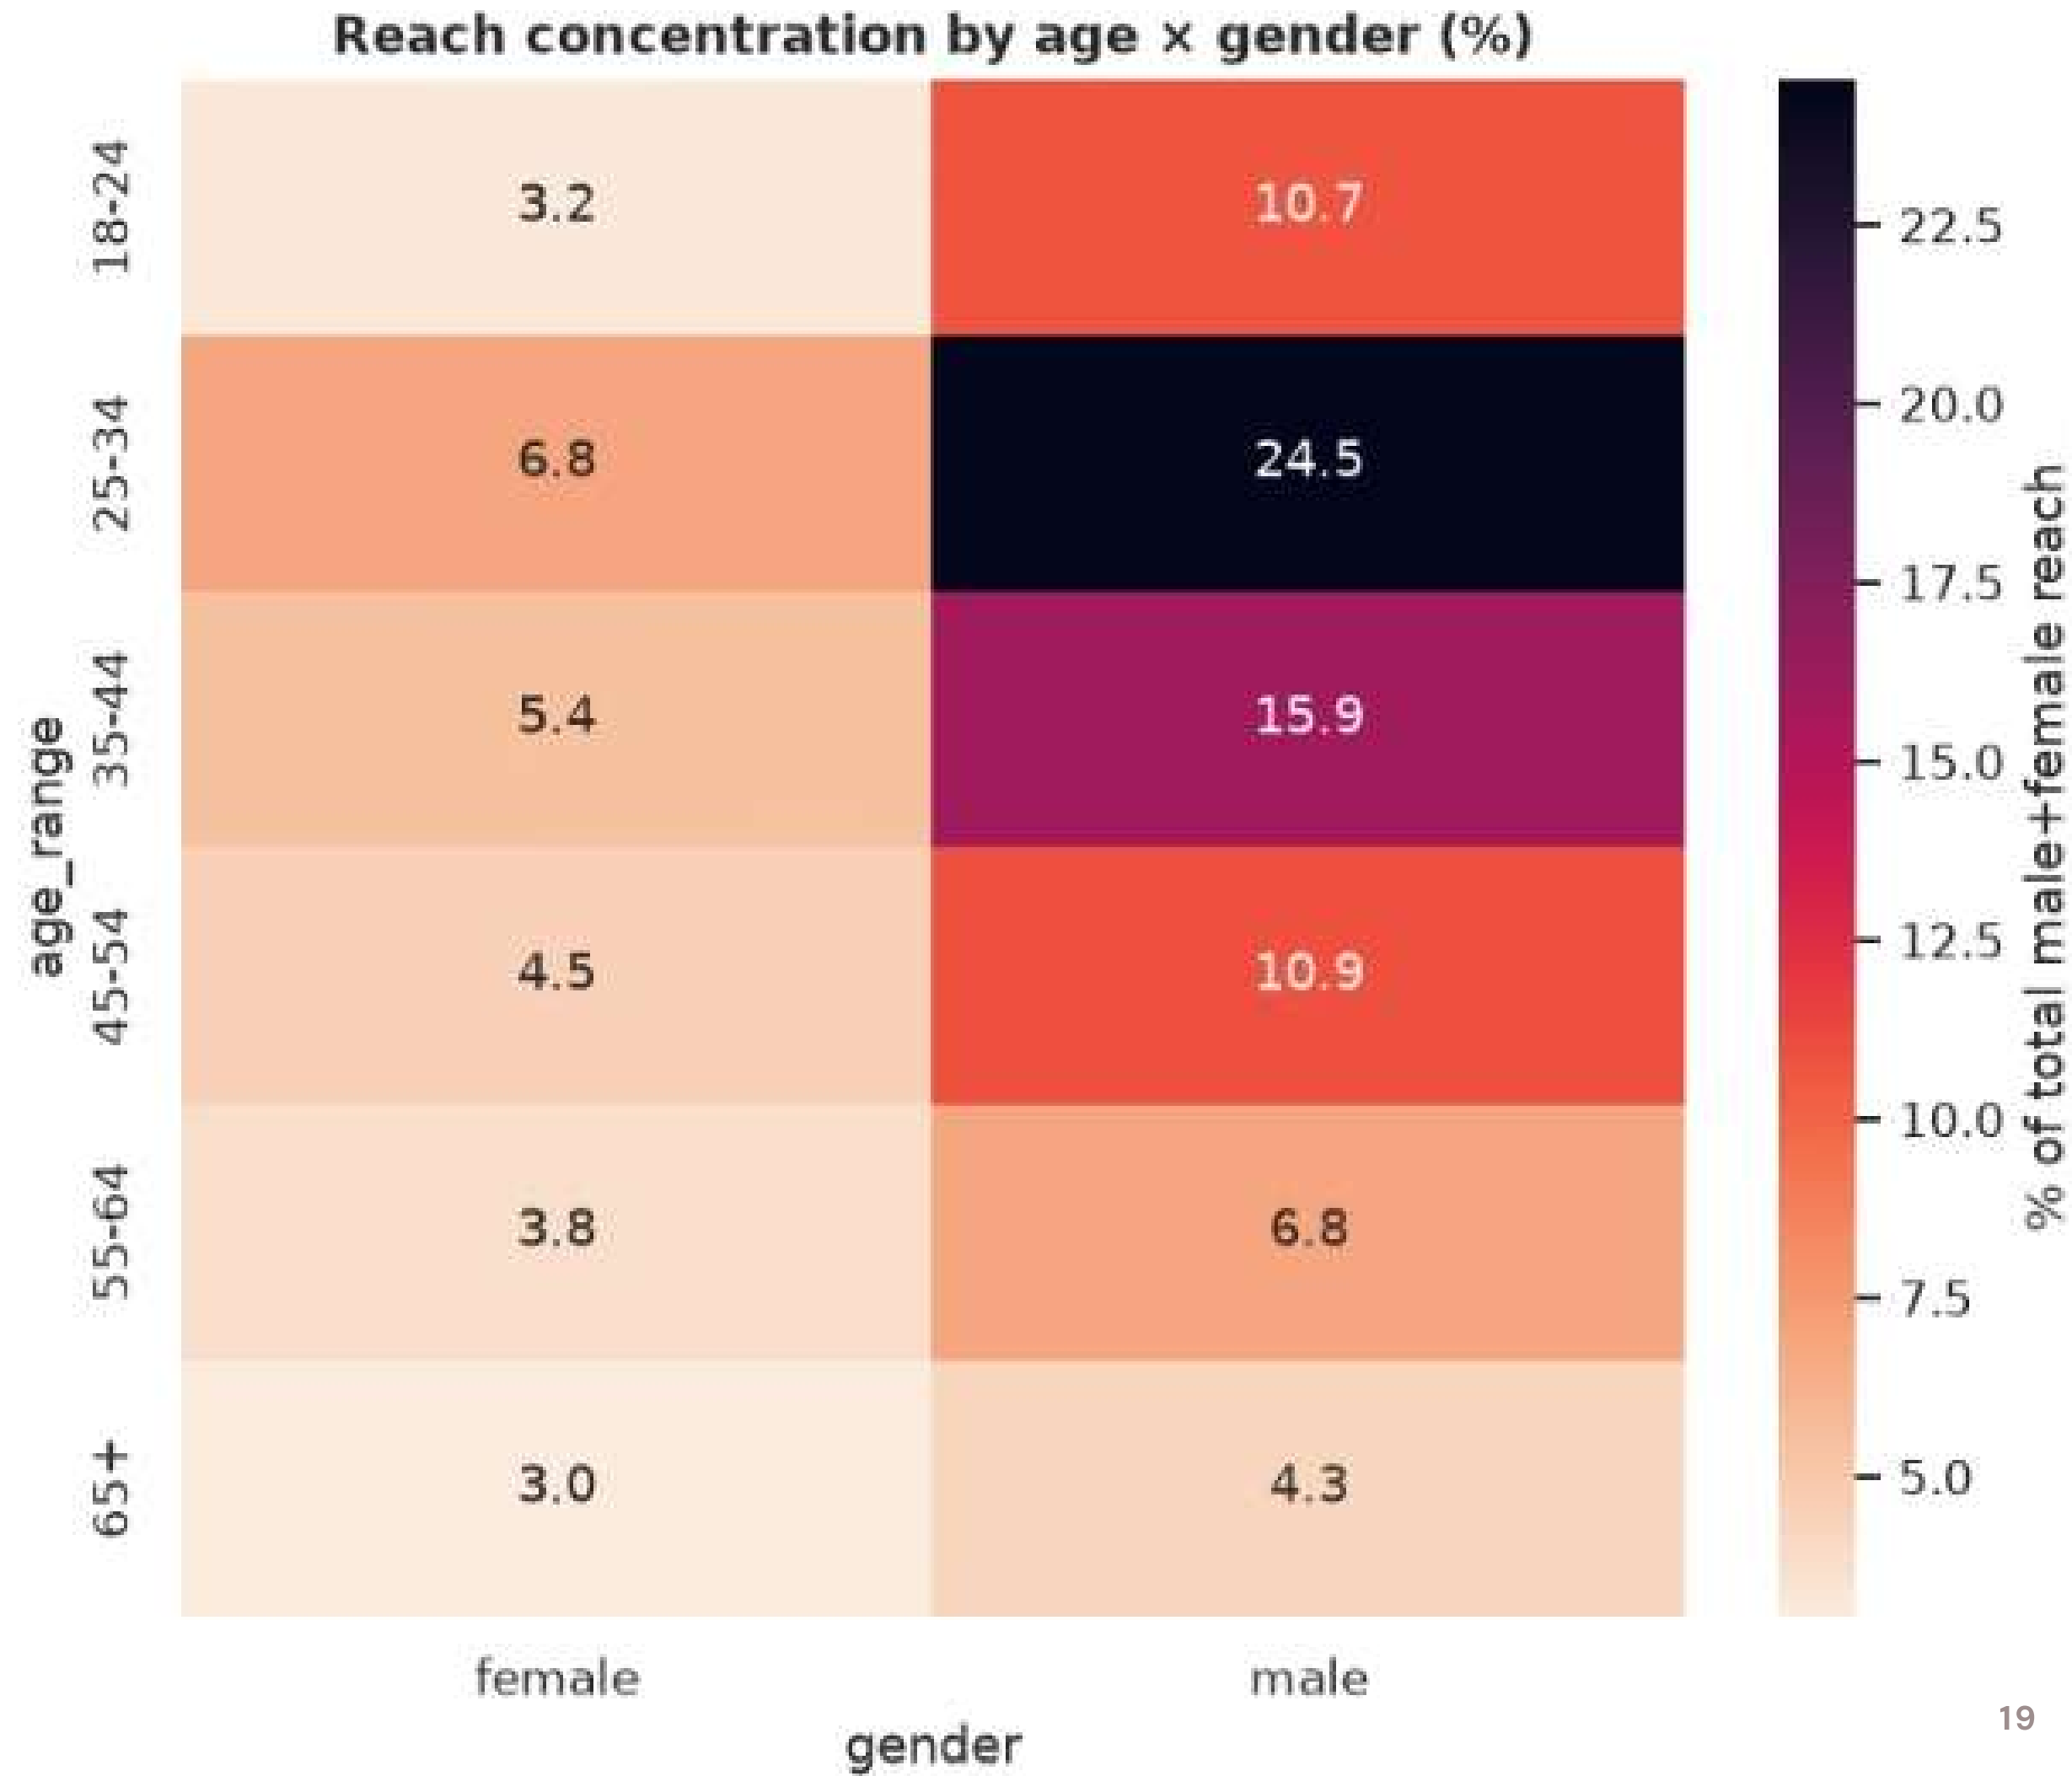

This is not an India problem

Meta Ad's found in

EU: 127,811

UK: 35,553

US: 8,370

supply chain of **AI-powered undressing tools** — applications, bots, payment networks and the platforms that host them — that make the **non-consensual** undressing of women a commercial activity

AI Economy Undressing Women

a 16 year old content creator →
victim of a troll network posting
nude images in bulk

the synthetic nude was embedded
as a brief flash mid-video, timed to
slip past automated moderation

Instagram said this didn't violate
their policy

*"I found ten to fifteen accounts. There are
hundreds of such accounts posting nude
images of women and young girls — AI-
generated."*

AI Economy Undressing Women

a 16 year old content creator →
victim of a troll network posting
nude images in bulk

the synthetic nude was embedded
as a brief flash mid-video, timed to
slip past automated moderation

Siddharth, co-founder of the **Rati
Foundation**

*"I found ten to fifteen accounts. There are
hundreds of such accounts posting nude
images of women and young girls — AI-
generated."*

*"At least ten per cent of the cases we receive
are about content generated or edited by AI
without consent"*

***"In India, there is intense shame associated with nudity and sexual acts.
Harassment has relied on the believability of the survivor being involved in sexual
acts portrayed in the content. What changed is who can manufacture that
believability."***
