Employment

Research Assistant, Aalto University Helsinki, Finland 08/2026 – Present
Working with [Juhi Kulshrestha](#) to analyse **350K+ ChatGPT** conversations from the UK, Germany, and Spain. Examining how people actually use AI across work, productivity, health, and other domains. Investigating the **economic**, **societal**, and **safety** implications of large-scale AI adoption, with the goal of informing safer, more inclusive, and human-centered AI systems.

Research Engineer, Tattle Civic Tech Delhi, India 08/2023 – 09/2025
Conducted research on **AI safety and online harms**, developing tools and datasets to understand online abuse. Created a dataset on **gender-based violence** and developed **AI safety benchmark** for **hate** and **sex-related** harms in India. **Evaluated** the safety and performance of AI systems across Indian languages, and collaborated with NGOs to red-team AI systems and develop **safety guardrails**.

Education

M.S. Computational Linguistics, University of Tübingen, Germany 2025–Present
B.Tech Computer Science, Ahmedabad University, India 2019–2023

Policy and AI Safety Work

- Investigated and mapped the commercial ecosystem of **non-consensual AI-generated** imagery in India, focusing on supply chains, payment systems, platforms, and regulatory gaps. Published as an investigative report in **Pulitzer Center** [[Report Link](#)].
- Contributed 2,000 region-specific prompts on **hate** and **sex-related** harms in India to the **MLCommons Alluminate** benchmark dataset. Identified gaps in the MLCommons v0.5 hazards taxonomy, particularly around culturally contextual harms that fall outside formal legal definitions of crime in South Asia.
- Worked with [Kiran Garimella](#) on a multi-source study quantifying **financial scams** in India, linking promotion on Meta ads to downstream user harms despite platform policies. Highlighted the use of **AI-generated deepfakes** in deceptive advertising and gaps in current regulatory framework.
- Member of a working group that authored a **policy report** on **Open Source AI** in India, analysing risks and proposing recommendations for government and the developer community.
- **Work Mention and Media Coverage:** [NY Times](#), [World Economic Forum](#), [Center for Democracy & Technology](#)

Technical Skills

Programming: Python (advanced); JavaScript, Elixir (intermediate)

ML/Data: PyTorch, TensorFlow, SQL, Pandas, NumPy, NetworkX, MLOps

Causal Inference: Synthetic Control, Difference-in-Difference, Placebo Testing
